cPanel®

Assign a License in Manage2

1. Log in to Manage2, under the *License* section, select *Add License* interface in *Manage2*: https://manage2.cpanel.net/addlisc.cgi

2. Enter the IP address(es).

3. Select licensing group (selected by default)

4. Assign the "WordPress Toolkit Autoscale" license from the Package options.

5. Click the "Add License" button.

cPanel®

Configure Partner Store in Manage2

In order to send customers that click the in-product upsells to your store, you must configure a custom store URL in Manage2.

1. Log into *Manage2*

2. Under *Company* section, select *Update Company Information* in the dashboard menu

3. In the *Sales Options* section of the company page, configure the "Custom Store" option for Purchase WordPress Toolkit:

Purchase WordPress Toolkit

Custom Store

my.store.com

cPanel®

Installation

1. Run the following command on the server's command line:

```
sh <(curl https://wp-toolkit.plesk.com/cPanel/installer.sh || wget -O -
https://wp-toolkit.plesk.com/cPanel/installer.sh)
```

2. Retrieve the license from the Manage2 (if assigned):

```
/usr/local/cpanel/scripts/wpt_license --download
```

3. Apply the license to WordPress Toolkit (if assigned):

```
wp-toolkit --apply-license
```

4. Ensure that the server can reach `https://ka.plesk.com:443` to renew its license.

cPanel®

Importing Existing WordPress Installs to WordPress Toolkit

All existing WordPress installations previously added manually, or with another WordPress installer (including WordPress Manager), should be detected during the initial scan following the WordPress Toolkit installation.

To manually migrate any WordPress installation into WordPress Toolkit:

1. Go to WordPress Toolkit in WHM (all accounts) or cPanel (single account).

2. Click *Scan.*

The WordPress installation will then be attached and visible in the list of existing WordPress installations within WordPress Toolkit.
